DEMETRA

by GREATIT

Growing everywhere.

A single platform, endless applications, tailor-made.

DEMETRA is the modular **controlled environment agriculture** platform for research and production: start from a defined solution and grow into **a complete infrastructure.**

Beyond agriculture

Your precision ecosystem

One platform for **micropropagation, grafting and acclimatisation, germination, speed breeding, medicinal plants,** experimental crops, alternative proteins and insects. Configured around your goals, for research and for production.

Precision control

Light, climate and nutrients under control

With **DEMETRAcontrol** we remotely monitor and adjust temperature, humidity, CO2, pH, EC and LED lighting: **reproducible conditions,** less water and fewer pesticides.

From pilot to scale

Grow with GreatIT

With DEMETRA you validate **crops, protocols, yields and resource use** at pilot scale, before investing. Then **we grow together:** we support you all the way to a full facility, from design to start-up.

CHOOSE YOUR DEMETRA

Demetra 20	Demetra 40
external size 6 x 2,5 x 2,8 m	external size 12,2 x 2,5 x 2,8 m
internal size 4,9 x 2,29 x 2,25 m	internal size 11 x 2,29 x 2,5 m
